Bangkok, Thailand

Engineering leader with 7+ years of experience in mobile app development, full-stack, and team management. Proven ability to drive innovation, foster team growth, and deliver scalable, high-quality products in fast-paced environments.

SKILLS

Full-Stack Development: React Native, Expo, Node.js, NestJS, MS SQL, Postgres, Swift, Flutter, ReactJS, NextJS

DevOps & Quality Assurance: Docker, Kubernetes, CI/CD (GitHub Actions, Jenkins, Fastlane), TDD, Automated Testing, AWS, GCP

Leadership & Collaboration: Agile, Stakeholder Engagement, Team Development, Stakeholder Engagement, Hiring

Software Architecture: Service-Oriented Architecture, Microservices, Scalable Systems Design

WORK EXPERIENCE

Ling Sep 2025 – Present
Senior Software Engineer *Bangkok, Thailand*

- Architected and delivered a path-based course progression system for a language learning platform supporting **76+ languages**, increasing learner engagement and retention.
- Designed a **flexible curriculum** decoupling architecture, solving a long-standing platform constraint the team considered immovable and directly enabling the product team to launch region-specific course redesigns for the first time.
- Drove engineering process transformation across a React Native and Node.js platform with **150k+ MAUs**, reducing ticket **rework rate to 3%** from a 10% quarterly target through cross-platform test video verification, AI-powered code reviews (CodeRabbit), and mandatory root cause analysis on bug tickets.
- Led migration to **trunk-based development** with merge-first code review and **automated backend deployments** on merge to main, eliminating environment drift and accelerating release cycles.
- Championed removal of deprecated UI framework (NativeBase), presenting a technical business case to the CEO and executing the migration to reduce long-term technical debt.
- Established cross-team sprint estimation sessions and engineering collaboration practices, breaking down silos and improving knowledge sharing across the development team.

OOZOU Oct 2021 – Aug 2025
Lead Mobile Developer *Bangkok, Thailand*

- Led development team of **6 React Native and iOS mobile developers**, leading hiring, career development, goal setting, and growth strategies to create a high-performing team culture.
- Designed and implemented the core architecture for a large-scale greenfield React Native mobile app, ensuring scalability and long-term maintainability, now serving **525k monthly users** with a **99.59% crash-free rate**.
- Contributed to full-stack development, assisting in the implementation of features and bug fixes for a **NextJS** website, **NestJS** backend, and **MS SQL** database.
- Owned and optimized **CI/CD** pipelines (GitHub Actions, Bitrise, Fastlane) to enable seamless deployment and accelerate delivery timelines.
- Facilitated team adoption of coding standards and development practices, reducing technical debt and improving maintainability across the codebase.
- Delivered **Swift**-based iOS features to enhance app functionality, while providing guidance to the development team.

Siam Commercial Bank Aug 2019 – Sep 2021
Mobile Developer *Bangkok, Thailand*

- Led a team of 20 developers, including a mobile frontend squad, to develop and enhance mobile banking applications with over **1M daily active users**, using React Native.
- Frontend **squad lead of 7 mobile developers** for multiple projects, upskilling them in React Native, Flutter, and Swift, achieving full team readiness in 2–4 weeks.
- Directed agile ceremonies and ensured alignment with client requirements for timely product releases.

- Developed features with unit testing in Swift, achieving KPIs of 99% crash-free users and **reducing technical debt by 40%**.

RingZero Game Studio

June 2018 - July 2019

C# Unity Developer

Bangkok, Thailand

- Developed **core gameplay** systems and UI components for a mobile tower defense game, contributing to its release build and internal testing.
- Supported the iOS release process, including working with provisioning profiles and certificates, gaining hands-on experience in mobile deployment pipelines.
- Worked on a first-person puzzle escape game (PC/Console), designing and implementing gameplay features and core systems such as **camera** control, puzzle mechanics, and player interaction.
- Developed racing gameplay logic and camera/vehicle systems in **Unity**.

EDUCATION

Sirindhorn International Institute of Technology

2018

B. Eng | Computer Engineering (AI, Machine Learning, Information Retrieval)

Bangkok, Thailand
